

## Feeding

- Feeding concerns:
- When was the problem noticed first:
- Nasal regurgitation: Present/ Absent
- Pneumonia: Present/ Absent
- Aspiration: Present/ Absent
- Ear infection: Present/ Absent
- URTI: Present/ Absent
- Respiratory stridor: Present/ Absent
- Wheezing: Present/ Absent
- Asthma: Present/ Absent
- Nasal/ chest congestion: Present/ Absent

## Feeding milestones

- Was the child able to effectively breast feed?:
- At what age bottle feeding was initiated:
- At what age bottle feeding was stopped:
- Can the child drink water from a bottle without coughing/ regurgitation liquid from nose, if the bottle is held by the adult:
- At what age semi liquid food introduced to the child's diet?:
- At what age was the child allowed to feed himself:
- By what age he was able to eat all textures of food?:
- Which utensils can your child use with/without help:

## Sensory issues in feeding

- Does the child have any strong food preference?:
- Does he/she strongly like/dislike any particular task?:
- Does he/she strongly like/dislike any particular food texture?:
- Does he/she strongly like/dislike any particular temperature of food?:
- Does he/she spit frequently during feeding?:
- Mouthing of inedible objects: Present/Absent \_\_\_\_\_

### Meal time behaviour checklist

Spits food	
Pushes food away	
Turns Head	
Keep mouth shut	
Screams/cries	
Over stuffs	
Leaves the table	
Hold the food in mouth	
Eats too fast/ slow	
Throws food	
Tantrum	
others	

### OPME

#### Lip:

mouth posture:

Spillage of liquid while drinking:

Symmetry:

#### Jaw

Symmetry:

Mastication movement: Adequate/ Inadequate

Can the child use jaw for sucking while breast feeding:

#### Tongue

Symmetry:

Does the child often bite his tongue while chewing:

Is the child able to effectively manipulate food in his/her mouth:

#### Oral cavity

Pocketing of food:

Are there food residue even after swallowing:

### Posture while feeding

- Is the child able to sit while eating?:
- Posture maintained during feeding:

### Repeated Saliva Swallowing Test (RSST)

	Food Used	Trial 1	Trial2	Trial3	Posture While Feeding	Assistive Utensils Used	Remarks
Dry							
Semiliquid							
Liquid							
Solid							

### Diet

- Type of feeding received:
  - Bolus
  - Continuous drip
  - Combination
  - others
- Time taken for feeding
- Quality of food intake: Normal/ Average/ Limited

### Compensatory feeding strategies

- Tube feeding information:
  - Current tube type:
  - % of calories intake;
  - Type of formula:
  - Bolus or continuous food:
  - Vomiting or other problem during feeding:

- Tube feeding shedule:

Time:

Amount:

### Nutrition:

- Current weight of child:
- Current height of child:
- Remarks on the child's body built:

Remarks:

Recommendations:
